

#### Hydraulic System

Mahindra employs hydraulic systems that are heavy and sturdy to ensure stability and safety. Compare ours to other brands and you can see the difference.

#### Front Axle

Mahindra insists on using bigger, thicker, stronger axles to achieve maximum stability.

#### Reinforced Fenders

Our fenders are reinforced and use a thicker gauge of sheet metal for strength and durability.

## The 20 Series gets the job done quicker and easier.

Superior performance. It's what Mahindra USA was built on. And now, the 20 Series offers yet another line of heavy-duty Mahindra tractors that are as efficient to your budget as they are on the job.

Mahindra tractors consistently outperform others in their class by being heavier and more durable – yet just as versatile. Their rugged, cast-iron chassis give the tractors extra weight, providing more traction, stability and control.

Our tractors have higher lift capacities. Carry bigger loads. Handle larger implements. And come in a wide range of sizes, so you can find one that's ideal for your workload.

Simply put, a Mahindra tractor does what needs to be done – quickly and efficiently.

### Customer satisfaction is high.

Who better to gauge our commitment to product quality than the people who own our tractors? In a recent study, a leading market research firm interviewed Mahindra owners nationwide and asked them to evaluate their level of satisfaction with the performance of their Mahindra tractors.

**98%**  
OF MAHINDRA OWNERS ARE LIKELY TO  
**RECOMMEND MAHINDRA**  
AND THEY RECOMMEND IT  
TO MORE THAN EIGHT PEOPLE

### A dealer network as sturdy and stable as the tractors they sell.

Mahindra dealers are fully qualified and armed with the resources to not only put you on the right tractor, but to continue to meet your needs after your purchase. We support our dealers with the ability to ship parts within 24 hours. We provide them with warranty assistance, technical support, low-rate retail financing and on-site approvals, making it quicker and easier to put you on the tractor of your choice.

## 10 years of cultivating dreams in the U.S.

Celebrating 10 years in the U.S., Mahindra is committed to providing high-performance, trouble-free tractors to the American industry for years to come.

From army vehicles to farm tractors to major automobile manufacturing, Mahindra's relationship with American industry goes back to World War II – when our parent company, Mahindra & Mahindra, assembled the famous Willys Jeep for American GIs.

After teaming up with International Harvester in 1963 to manufacture tractors, M&M today ranks among the largest tractor companies in the world, with an annual production capacity of 110,000 and sales in over 10 countries.

In 2002, Mahindra USA's Tomball, Texas facility was joined by a second assembly and distribution center in Calhoun, Georgia, 68 miles north of Atlanta – more than doubling our production capacity to meet growing demands for our tractors.

#### Loader

Whether moving earth, scraping a surface or smoothing a gravel road, Mahindra's loader is a rugged and extremely versatile tool.

#### Bale Spear

This solid metal implement is a convenient tool to have on hand. Combined with Mahindra's outstanding lift capacity, the bale spear will help you move all kinds of loads.

#### Grill Guard

Protect your nose from those annoying dents and dings that often occur during the course of a hard day's work.

#### Quick Attach Adapter

This well-designed feature makes swapping out implements a snap, so you can spend less time assembling and more time getting your work done.

## 7520 4WD

Engine	NE475TC
Type	Four stroke, direct injection, water-cooled, diesel
Cylinders	4
Engine HP (kW) @ rpm	75 (55.9) @ 2300
Compression Ratio	18.4
Displacement cubic inch (cc)	194.7 (3192)

Electrical	
Battery Capacity	12 volt, 925 CCA
Alternator	12 volt, 45 amps

Clutch	
Type	Dual dry with cerametallic lining

Transmission	
Type	Forward-Reverse Synchro-Shuttle with full synchromesh
Number of Speeds	12 x 12

Front Wheel Drive	
Type	Mechanical

Steering	
Type	Hydrostatic power & tilt steering
Pump Output (gallons per minute)	5.2

Brakes	
Type	Wet disc

Hydraulic System	
Type	Open center, full-live hydraulic with position and draft controls
Pump Output (gallons per minute)	17
3-Point Linkage	Category 2, with telescopic lower link and stabilizers
Lift Capacity (lbs.)	5500
Auxiliary Remote Valves	2 spool standard with two position detent and float

PTO	
Type	Independent
PTO RPM (engine rpm)	540 & 1000 @ 2200 with dry reversible shaft
PTO HP (kW)	65 (48.5)

Operating Weight	
Total (lbs.)	7200

Dimensions	
Overall Length Inches (mm)	157.5 (4004)
Overall Width Inches (mm)	76.5 (1944)
Turning Radius Min. Ft. (mts)	13 (3.9)

Tires Sizes and Options	
Ag (Front / Rear)	11.2x24 / 16.9x30
Industrial (Front / Rear)	19.5Lx24 / 12.5x80x18

Loader	ML275
Maximum Lift Height	132"
Clearance with Attachment Dumped	123"
Reach at Maximum Height	37"
Maximum Dump Angle	52°
Attachment Rollback Angle	29°
Digging Depth Below Grade	6.5"
Lift Capacity to Full Height @ Pivot Pins	3900 lbs.
Breakout Force @ Pivot Pins	5500 lbs.
Rated Flow (Tractor System)	17 gpm
Attachment width used for specification	78"
Attachment rated capacity used for specification	22.82 cu. ft.
Cycle Times @ rpm	2500 rpm
Raise Boom (seconds)	6.2
Lower Boom (seconds)	4.1
Dump Attachment (seconds)	3.2
Retract Attachment (seconds)	2.5

Optional Attachments	
Grill Guard	✓
Quick Attach Adapter – Pin On	✓
Bale Spear (for QA Pin On)	✓
Pallet Fork (for QA Pin On)	✓

Skid Steer Attachments	
Bucket – Skid Steer Compatible	✓
Quick Attach – Skid Steer Compatible	✓
Bale Spear – Skid Steer Compatible	✓
Pallet Fork – Skid Steer Compatible	✓
Self-leveling Valve Kit	Optional
